

ANTI-SIZE PASTES (500 g)

supreme quality through hard work...

products for the most demanding clients

Professional Workshop Chemistry

Since 1994, Chester Molecular Ltd. specializes in industry services. We are a world leading manufacturer of composites, sealants, adhesives, protective coatings, surface preparing agents and workshops chemistry. Chester reliable technology stems from decades of experience and knowledge and the innovation and modernity makes CHESTER solutions ideal for the most demanding customers. Thanks to this cooperation, guidance and often unique technology, our partners are assured of the highest quality and the success of the application.

Anti-size paste PM-1100

Anti-size paste PA-1100

Anti-size paste PM-1200

Based on high-refined mineral oil and synthetic lubricant, with copper extras. Protects against seizing of screwed connections, eases disassembly. Resistant to bases, acids and water (also sea water). Designed for montage of screwed connections and for lubrication of parts working in high temperatures. Can be exposed to steam. Recommended for montage of screwed connections, lubricating of splined connections, slide bearings, sideways, tension members, opened toothed and worm gears, bearings and oils.

PENETRANTS AND RUST REMOVERS (500 ml)

DEGREASING AND CLEANING AGENTS (500 ml)

LUBRICANTS (500 ml)

Penetrant F-1

- Penetrates and lubricates
 - Dislodges moisture
 - Colonizes

Just penetrant F-2

- Loosens corroded and seized connections
 - Removes rust and seized lubricants
 - Does not contain silicone oil
 - St remover with great penetration
 - Remanettes: invades into corroded and seized connections. Ease removal of screw connections, Loosens mandrels, gudgeon pins, main links, rod ends, products etc.
 - Used in following industries: automotive, steel, shipyards, automotive, farming.

Ultra Fast Degreaser F-6

- Leaves no residue
 - Prepares surfaces for application of the adhesives

Fast Cleaner F-7

- Cleaning and degreasing process
 - Leaves no residue
 - Harmless to people

Based on aliphatic solvents. Removes oil and other industry dirt. Design and degrading of machine parts, engine parts, mechanical advantages.

Used to prepare surface prior to application of Chester two-component comp. used to repair rubber surfaces.

A close-up photograph of a person's hand wearing a blue latex glove. The hand is holding a black aerosol can of spray paint. The label on the can features a large, stylized white letter 'S' followed by the number '1'. Below the 'S-1' logo, the words 'SPRAY PAINT' and 'ENVIRONMENTALLY FRIENDLY' are printed in smaller white text.

Dry lubricant PTFE F-14

- Dry slip agent
 - Does not contain oils and lubricants
 - Separator and anti-adhesion agent
 - Effective up to 260°C

A close-up photograph showing a person's hands wearing blue nitrile gloves. One hand holds a black spray can with a red label and white lettering, while the other hand uses a red paintbrush to apply a vibrant red paint onto a metallic bullet. The background is a solid red color.

Chain oil clear F-15

- Lubricant with very high adhesion
 - Does not drip from lubricated surfaces
 - Very good penetration parameters

Lubricant based on synthetic and mineral oils.
Contains corrosion inhibitors, adhesion and antiadhesive extras. Perfectly adheres to lubricated surface. Protects against rust.
Resistant to water (also sea water).
Does not contain silicone oil. Designed to lubricate chains, steel lines, lifelines, tension members, etc.

Lubricant E-5

- Lubricates and protects from corrosion
 - Contains corrosion inhibitors and PTFE
 - Does not contain silicone oil

based on paraffin wax and deeply refined mineral oil.

 - Contains corrosion inhibitors, adhesion and antioxidant extras and PTFE. Can be used as temporary protection against corrosion of metal parts while they are stored. Recommended to lubricate slides in machines, tension members, radiators, hoods, wagons, garden equipment, mobile structures, mowers.

Sociedad Romana F 0

- Does not drip on vertical surfaces
 - Harmless to people
 - Eco friendly

A clear plastic bottle of Gatorade Thirst Quencher Zero Sugar Lemon Lime flavor. The label features the Gatorade logo at the top, followed by "Thirst Quencher" and "ZERO SUGAR". Below that, it says "LEMON LIME" and "12 FL OZ (355 mL)". The label also includes "Beverage with Electrolytes" and "Great Taste. Less Sugar." A yellow straw is partially inserted into the bottle.

Anti-cize macte E 11

- | | |
|--|--|
| Lubricants and protectors against seizing | Based on lithium lubricant with aluminum, carbon and graphite extras. Protects against seizing of screw connections, eases disassemble, lubricates |
| Resistant to bases, acids, water
(also sea water) | Secures from pitting and corrosion. |
| Effective up to 110°C | Recommended for assemble screw connection
Lubricating of splined connections, short-Service life
Bearings, slideways and tension members, especially |

A close-up photograph showing a hand holding a black spray can, spraying a white adhesive onto a metal component. The component appears to be a cylindrical part with a ribbed base, possibly a bearing or a bushing. The background is blurred, suggesting a workshop environment.
